

NIC Industries restricts the sale of Gen II coatings to military and law enforcement agencies only.

We will require a letter of authorization from the military or law enforcement agency that you are coating for or that you are with. This letter must contain either the Department of Defense, Branch of Military or Police Department signed by a Captain or above, on their respective letterhead, authorizing you to apply this coating on X amount of items with the specified color.

Cerakote Gen II Coatings are the next generation of firearm coatings developed specifically for military small arms and crew-served weapon applications where a capability is needed to manage the visual and near-infrared signature while at the same time enhancing durability, reliability and maintainability.

In addition to the signature management capability, Cerakote Gen II offers superior wear and corrosion resistance under a wide variety of adverse environmental conditions likely to be encountered in all theaters of operation.

Cerakote Gen II is designed to conform to the NIR reflectivity standards outlined in MIL-DTL-44436.

Supply to the United Kingdom : Cerakote Gen II products are restricted to Section 5 authorised, Registered Firearm Dealers (RFD) who are Certified Instructors. The products are only to be used on MOD and Law Enforcement firearms and accessories and must be under contract at the time of purchase.
