

TECHNICAL DATA SHEET

Cerakote[®] **C-Series** Ambient Cure Ceramic Coating has been designed to protect both metal and nonmetal substrates. Additionally, the **C-7300 Black Velvet** has been designed to withstand extreme use temperatures (1,800°F). This makes the coating ideal for mid-temperature system and firearm applications. **Cerakote C-Series** Ambient Cure Ceramic Coatings maintain excellent adhesion even after repeated thermal cycling. These coatings provide superior protection again corrosive environments and thermal shock. In addition, the **C-Series** Ambient Cure Ceramic products are designed for ease of application.

> **Cure Schedule:** Tack free in 45 – 60 minutes Dry after 24 hours 100% cure after 5 days

Cerakote C-Series Ambient Cure Ceramic Coatings are available in several metallic or non-metallic finishes and different gloss levels. Visit <u>www.cerakote.com</u> to view a complete color chart.

Contact a Cerakote sales representative to determine which coating is appropriate for your application.
